

From Real-World Scene to Digital Image Representation

Literature Sources :

- Gonzalez and Woods - Digital Image processing
- Richard Szeliski - Computer vision
- Open CV Documentation
- IEEE Computer vision papers
- CVPR Proceedings.

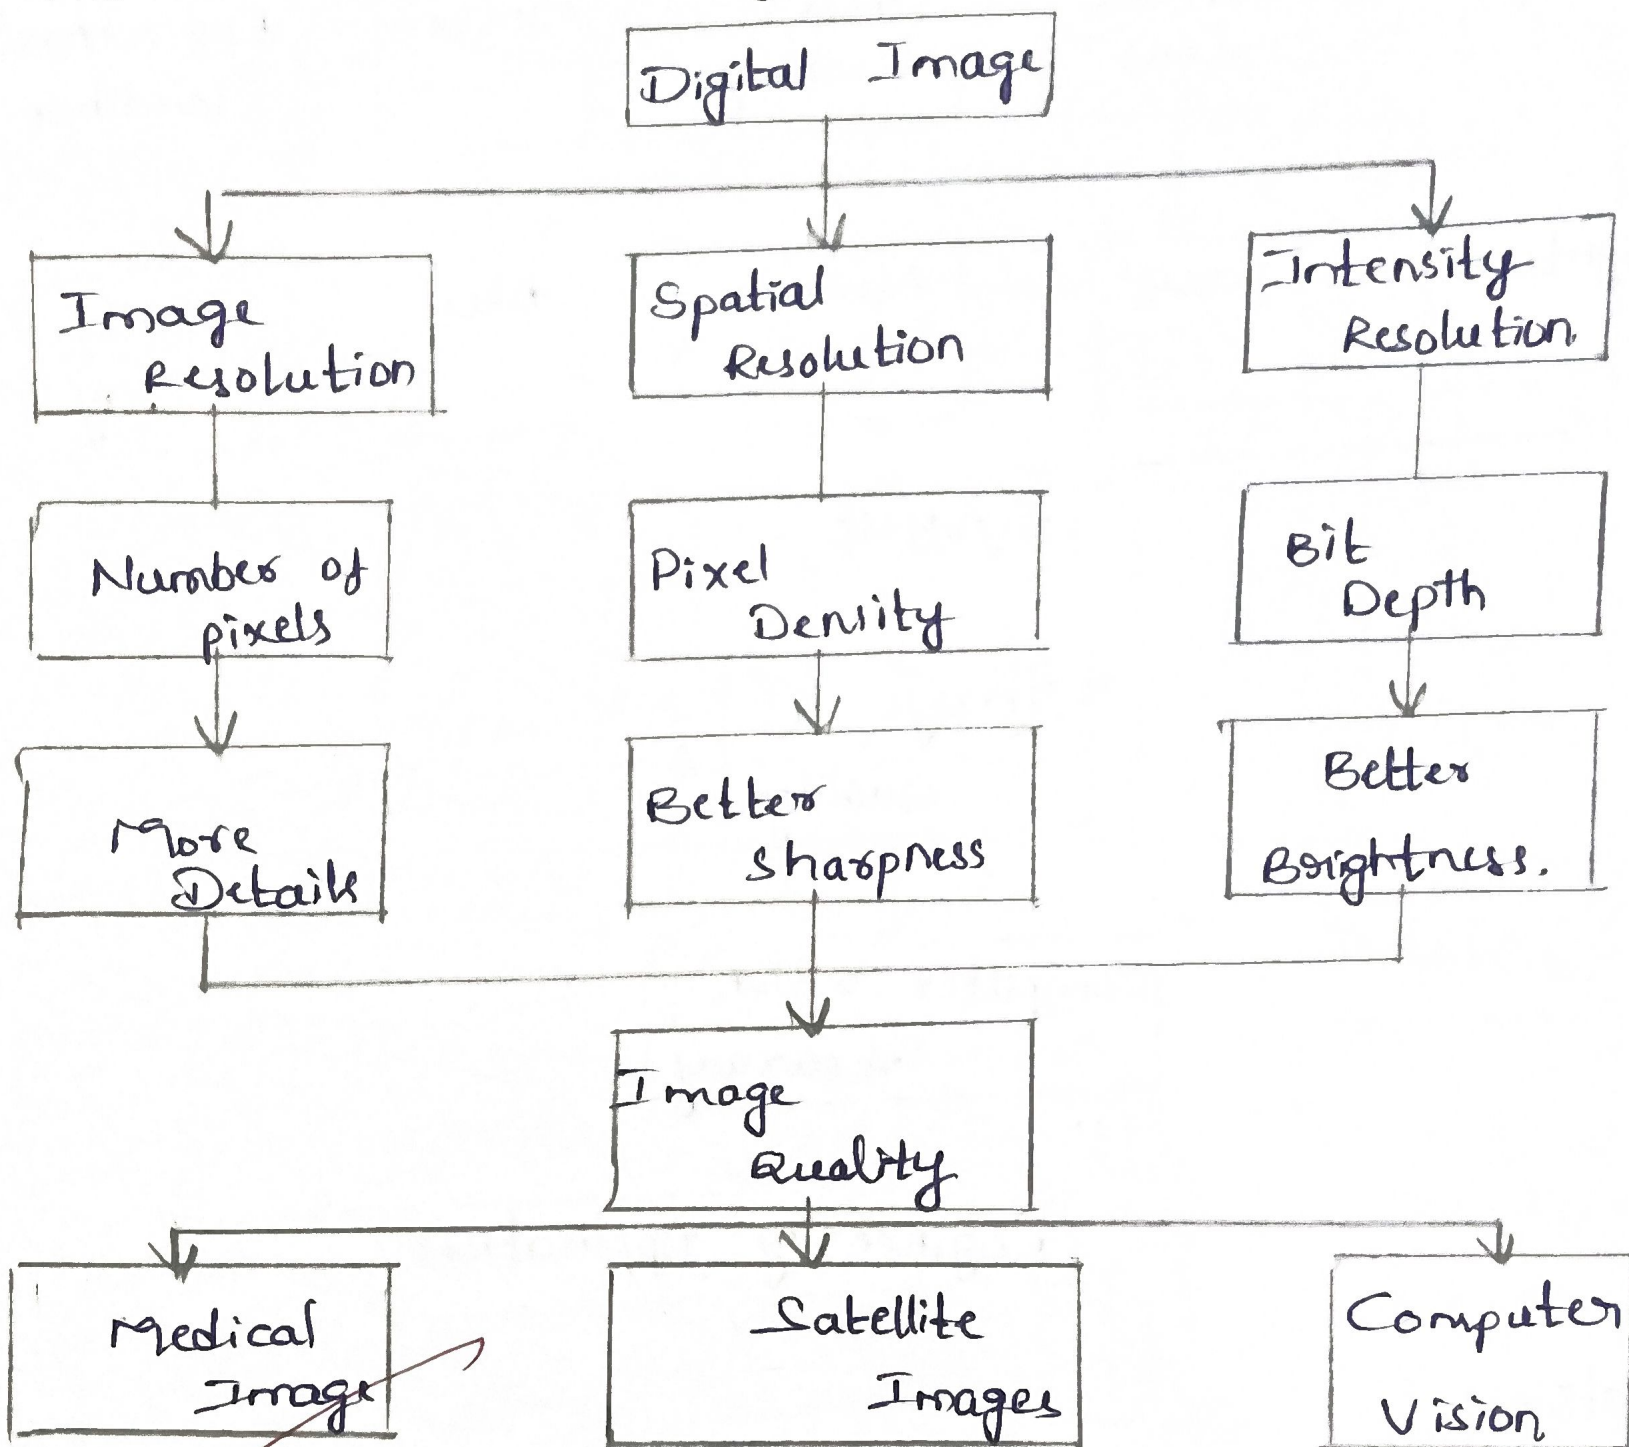

② Computer vision pipeline

Applications:

- Face Recognition
- Medical Diagnosis
- Autonomous Vehicles
- OCR
- Robotics

Resolution and Image Quality

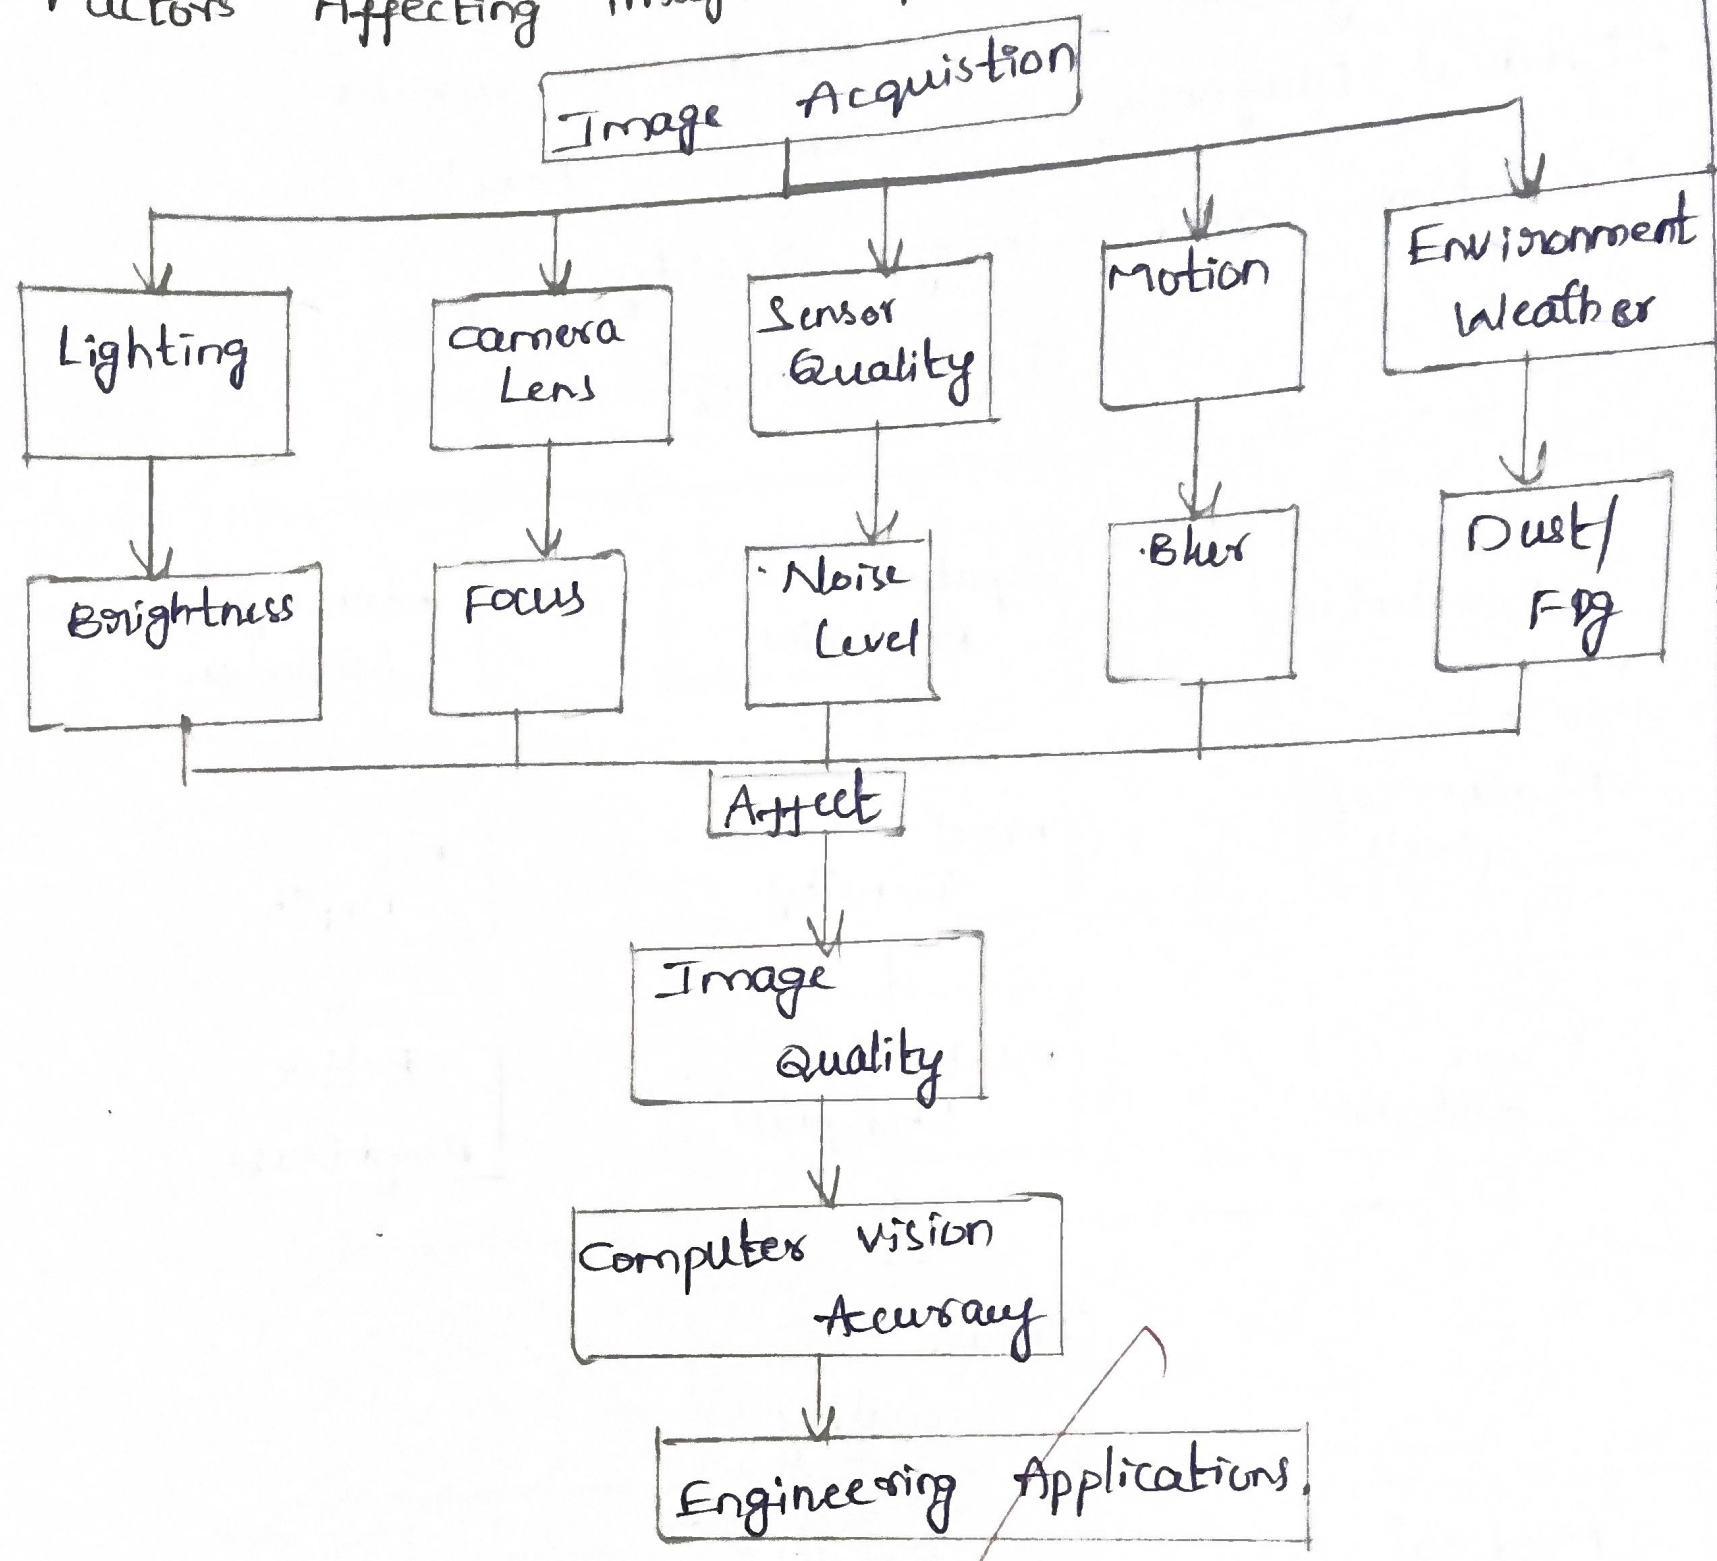

Effects:

- Higher Resolution - Better Details
- Higher Bit Depth - Better Contrast
- Low Resolution - Information lost

④

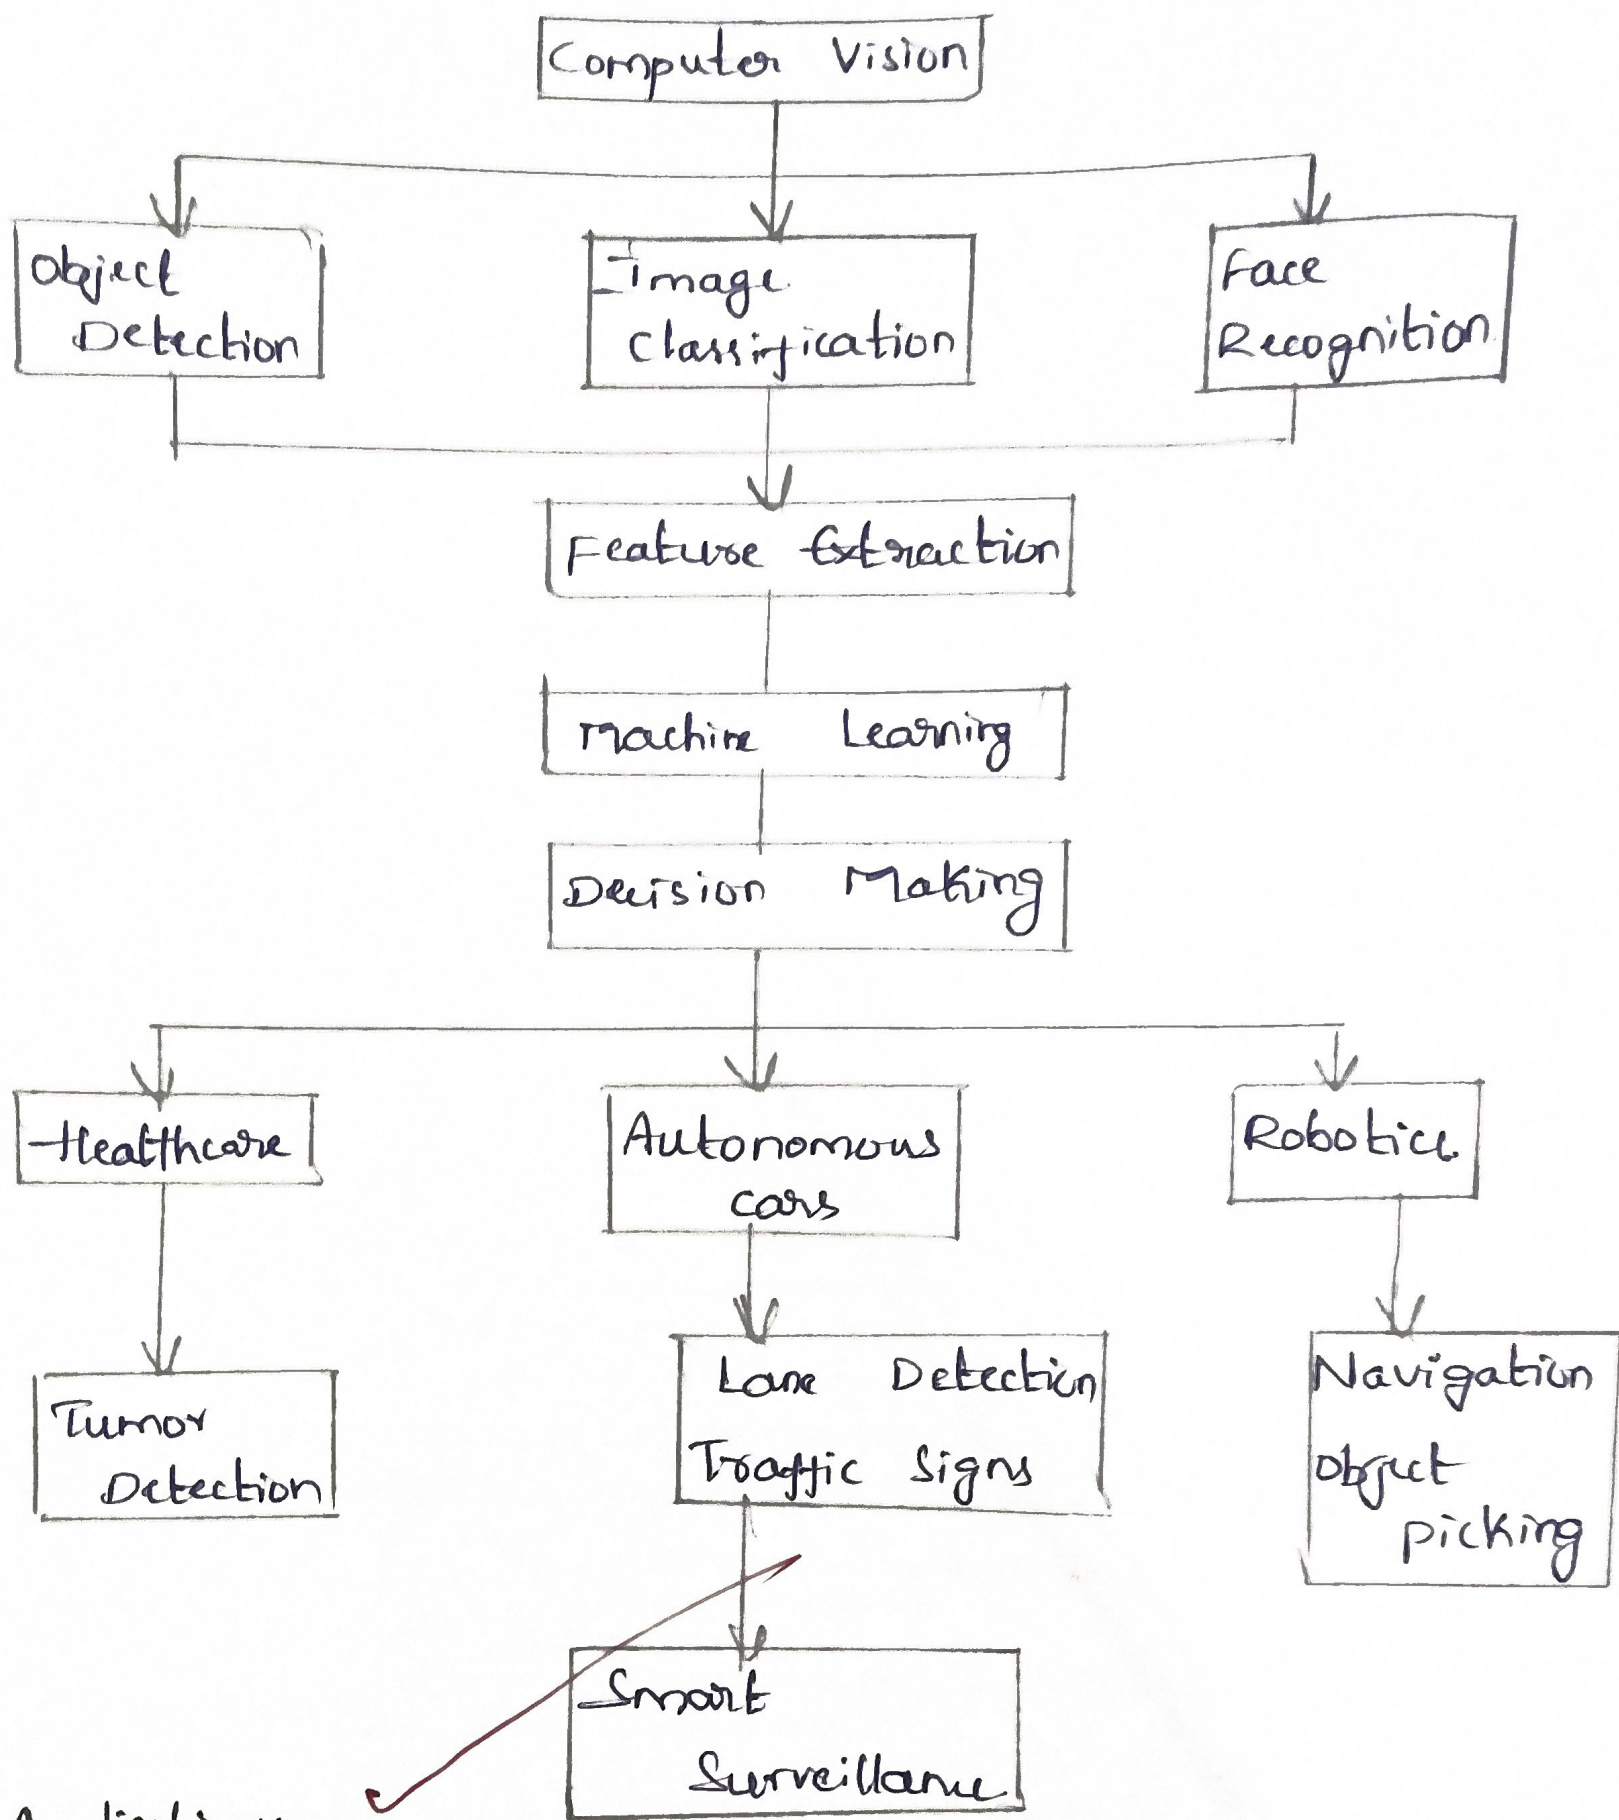

Factors Affecting Image Acquisition

Applications:

- Autonomous Vehicles
- Medical Imaging
- Industrial Inspection
- Security Systems

Computer Vision Capabilities and Applications

Applications:

- Healthcare
- Agriculture
- Manufacturing
- Security
- Smart cities
- Autonomous vehicles
